The Teacher's Guide to Digital Citizenship.

In an effort to keep everyone behaving, Microsoft has just unveiled [a new \(free\) curriculum](#) that's all about [digital citizenship](#)

, [intellectual property rights](#)

, and

[creative content](#)

. It offers cross-curricular classroom activities that align with the AASL and ISTE national academic standards. So far, more than 6,500 people have registered to use the curriculum. No matter how you feel about Microsoft, this free offering is worth checking out. You'll have to register an account but after that it's easy to find, select, download, and implement some of the objectives presented.

How It Works

Four units comprise the curriculum resources. Each unit consists of standalone yet complementary lesson plans that play off a creative rights scenario presented through a case study. Four units comprise the curriculum resources. Each unit consists of standalone yet complementary lesson plans that play off a creative rights scenario presented through a case study.
